

BlazeClan Receives ISO 27001 Certification for Cloud Services

BlazeClan's Cloud Services are Certified Compliant with ISO/IEC 27001:2013 Information Security Management System Standard

Pune/Mumbai, India – January 15, 2018

BlazeClan Technologies, the leading cloud consulting company, has received ISO 27001 Certification for Management of Information Security in Development, Implementation and Deployment of cloud hosting services along with support and maintenance. BlazeClan underwent an internal multi-department audit. As a result, BlazeClan explored performance metrics and examined all functional procedures to ensure that they were performing optimally and as intended. This was followed by a rigorous two-stage audit with a certified independent party - TÜV SÜD South Asia Private Limited. The auditor at TÜV SÜD South Asia examined every department's processes, controls, and systems to verify proper execution.

“Being endorsed by an internationally recognized body ensures that we follow the best practices adhering to the strictest security standards. In addition, receiving the ISO Certification brings a peace of mind to our customers and assures them that BlazeClan is committed to deliver exceptional cloud services.” **Says Varoon Rajani, CEO, BlazeClan Technologies.**

BlazeClan's Development, Implementation and Deployment of Cloud hosting services will now consist an independent validation status, which will enable us to securely manage information security, retain project confidentiality along with integrity and availability of all data.

Veeraj Thaploo, CTO, BlazeClan Technologies says, “It's a worthy upgrade to our cloud security armament. Moreover, with the certification, a certain amount of rules and procedures that reduce the risk in the management of operational processes and improve information security management will be followed. Reliability, safety and quality are the key values that push us to continuously grow, achieve goals and provide the best services to our customers.

Deepak Kagliwal, Director Sales and Marketing, BlazeClan Technologies, stated, "ISO 27001:2013 brings in a host of benefits for BlazeClan, our customers can be rest assured of their data to be confidential. Furthermore, it minimizes risk exposure and fosters a culture of security for our clients. In addition, even when you think your processes, systems and procedures are performing optimally, you find that there is room for improvement and growth. These are few reasons that we prioritized and considered from our customers point of view before going ahead with the ISO certification."

BlazeClan has a comprehensive customer portfolio from various verticals like media and entertainment, banking, financial services and insurance industries, etc. Some of its top customers include Domino's, Viacom 18, Astro International and the Bombay Stock Exchange.

About BlazeClan Technologies
