BlazeClan Attains AWS Managed Services Partner Status for the Fourth Time in a Row

MSP Partner Program Validates BlazeClan Technologies Ability to Serve its Customers by Deploying and Managing AWS Cloud Services Efficiently.

Pune, India – July 17, 2018:

[BlazeClan Technologies,](#) a global cloud consulting company, announced that it has successfully achieved the AWS Managed Service Provider (MSP) Partner status for the fourth consecutive year. The AWS Managed Service Program is designed for qualified AWS Partner Network (APN) Consulting Partners who have the capabilities to provide exceptional leadership in AWS Next-Gen Managed Services and showcase continuous dedication and commitment towards customers' success.

As a cloud consulting and a managed service provider, BlazeClan has evolved over the years with new learnings and by adhering to AWS best practices towards managing, optimizing and securing cloud infrastructure for its customers. Moreover, our clientele receives the benefits of agility, reduced CaPex, scalability of workloads and high-response time which is equally highlighted in the audits being done by AWS.

"The AWS Managed Service Provider (MSP) Partner status has validated our competencies and expertise equally highlighting the focus of our team for providing quality service to our customers' success. In addition, attaining the AWS MSP Partner Status would be a continuous process for the coming years as well" Said Veeraj Thaploo, CTO – BlazeClan Technologies.

The audit conducted by AWS further validated our technical and business capabilities and also our proven customer success track record. On an average, BlazeClan resolves more than 20,000 tickets and monitors more than 500,000 AWS instance hours monthly for our global customers. Also, with the right skillset, knowledge and understanding of industry's best practices, BlazeClan provides innovative solutions for SysOps and DevOps automation which is a part of the Managed Service offering. Under the fully managed service offering, BlazeClan segregates the customers' requirements according to L1→L2→L3 skill levels with escalation up and education down approach.

BlazeClan's Cloud Management Platform (CMP), is a default offering under the umbrella of Cloud Managed Services. It is designed to empower our teams to efficiently manage the clients' AWS cloud environment by providing actionable insights, detailed overview and auto detection of the Newly

Added Infrastructure, Automation of Runbook and Incidents, Synthetic Monitoring, Script Monitoring, etc.

"Cloud Managed services at BlazeClan serves as an extended arm of our clients and we strive to provide monthly and quarterly consultation on cloud security, architecture and cost optimization which provides on-going value-add to our clients. Blazeclan's managed services orchestrate various methods to engage customers and maximize customer experience. This includes monthly governance and quarterly Customer Satisfaction Review (CSAT) drives." Said Sachin Dandekar, Head of Cloud Managed Services – BlazeClan.

###
