

BlazeClan achieves AWS Migration Competency Status

AWS Migration Competency status demonstrates BlazeClan's technical proficiency and customer success in migrating more than 100 servers or multiple applications.

Pune, India – June 19, 2018:

[BlazeClan Technologies](#) announced today that it has achieved [Amazon Web Services \(AWS\) Migration Competency](#) status. The AWS Migration Competency status adds to its achievements of AWS DevOps, Finance and Big Data Competencies achieved previously. This designation recognizes that BlazeClan provides in-depth expertise to help customers move successfully to AWS, through all phases of complex migration projects, discovery, planning, migration, and operations.

Achieving the AWS Migration Competency differentiates BlazeClan as an AWS Partner Network (APN) member that provides specialized demonstrated technical proficiency and proven customer success with a specific focus on technology for automated assessment, planning and migration of large scale applications and data centres to the cloud. To receive the designation, APN Partners must possess deep AWS expertise and deliver solutions seamlessly on AWS.

*“BlazeClan is proud to achieve AWS Migration Competency status,” said **Veeraj Thaploo, CTO at BlazeClan Technologies**. “Migrating our clients to AWS Cloud helps them to reduce complexity, and maximize their returns. Our team is dedicated to helping companies achieve their technology goals by leveraging the agility, breadth of services, and pace of innovation that AWS Cloud services provides,” he added.*

BlazeClan implements a 6R Methodology for categorising the migration, consisting of Re-Host, Re-Platform, Re-Factor, Re-Purchase, Retain and Retire. Based on the specific business requirements, the appropriate category is selected and the migration methodology is implemented. Moreover, BlazeClan leverages the optimal combination of AWS infrastructure services for each customer, and implements the best practices to efficiently migrate applications from on-premises to the cloud.

AWS is enabling scalable, flexible, and cost-effective solutions from startups to global enterprises. To support the seamless integration and deployment of these solutions, AWS established the [AWS Competency Program](#) to help customers identify Consulting and Technology APN Partners with deep industry experience and expertise.

###

About BlazeClan Technologies

BlazeClan is an AWS Premier Consulting Partner, providing cloud consulting and managed services. An organization that is born in the cloud, it has an international presence with offices across Malaysia, Singapore, Belgium, U.S.A., Australia, New Zealand and Canada, along with a strong sales presence and primary delivery center in India.

Established in 2010, BlazeClan has attained various accolades including AWS Premier Consulting Partner status, AWS Managed Service Provider Partner status, AWS Financial Competency, AWS Certified Big Data, AWS Service Delivery Program (Amazon Redshift), AWS DevOps Competency status, ISO/IEC 27001:2013, AWS 100 Certification Distinction, Customer Obsession Recognition 2014 and 2015, Partner of the Year ASEAN 2015 and Consulting Partner – India.
