

# BlazeClan and GrabCrew Simplifies Job Opportunities for the F&B Sector

BlazeClan develops an iOS and Android application for GrabCrew to connect employers and staff at the touch of a button.

**Singapore – May 18, 2018**

[BlazeClan Technologies](#) a Premier AWS Consulting partner, has developed an Android and iOS applications for GrabCrew which promises blue collar jobs in Singapore. GrabCrew aims to revolutionize the traditional recruitment markets (Service & Retail Industry) by leveraging edge Location Based Service (LBS) and real-time technology which is a cost effective and a functional solution than other available alternatives, and this was only possible through the expertise provided by the BlazeClan's app development team. The app also helps in addressing other auxiliary problems like attrition and attendance rates of existing service and skilled trade staff.

In addition, the automated GPS-based smartphone recruitment application enables employers to post their part or full-time job requirements where the system matches the relevant prospects based on geographic locations, qualifications and industry experience. The application then notifies both the parties (Employee and Employer) to contact each other so they can follow-up further for interview arrangements in a cost effective manner.

From a human resource perspective, the application mitigates the gap between the employee and employer. As a matter of fact, the need for part or full-time labour is a huge issue in Singapore, however, with the real-time response functionality job searches have been eased out. The application also enables both the parties to download a summary sheet of the job which has been applied for.

The design approach for the mobile application has been kept minimal and functional. On the functionality aspect, the GrabCrew app cuts the middle man and allows fast, flexible and a direct response to job searchers and job placements.

"The industry is faced with a huge labour shortage, especially in the food and beverage services and retail trade, and this is where GrabCrew steps into the picture to mitigate the requirement." Says **John Tan, CEO – GrabCrew**.

In addition to application development, BlazeClan is also providing managed services and an integrated payment systems to support the Google Pay and Apple Pay embedded with high-end security. With BlazeClan's 24/7 Managed Service offering, GrabCrew is able to focus on their business rather than manage their IT.

"It's been a great run with GrabCrew, John has been open to new thinking and opportunities BlazeClan has to offer. Moreover, it's the need of the hour for us to provide and implement innovative outcomes which can solve the issue of impromptu disappearance of service staff in the F&B industry." Says **Rahul Prasad, Director Sales - BlazeClan Technologies**.

###

### **About GrabCrew**

GrabCrew is a location-based smartphone recruitment platform designed to address the labour shortages prevalent in all service and retail trades. GrabCrew aims to revolutionize the traditional recruitment markets with its real time and location base apps available to all iOS and Android mobile devices. Our vision is to revamp recruitment in the Service industry, making the traditionally tedious process around the world more efficient and more cost effective, and one that we can all be proud of.
